Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 20 May 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-42 is/are pending in the application.
- 4a) Of the above claim(s) 3,6-10,12-16 and 28-42 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,2,4,5,11 and 17-27 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

## DETAILED ACTION

### *Election/Restrictions*

Claims 3, 6-10, 12-16 and 28-42 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 4, it is unclear what applicant regards as an elongate member extending only partially around the perimeter. What is the reference numeral?

### *Claim Rejections - 35 USC § 102*

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4, 5, 11, 17-20 and 22-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Ebling et al U.S. Pat. No. 4,934,340.

Ebling discloses an elongate body defining a proximal portion and a distal portion and a wall defining an inner surface, and outer surface and a lumen extending from the proximal portion to an aperture in the distal portion (fig. 1);

Art Unit: 3763

a steering wire having a distal portion operably connected to the distal portion of the elongate body (20); and a stiffening member associated with the distal portion of the elongate body (22); as to claim 2, (22 is located within a lumen which does not have a reference numeral, See figs. 2 and 3); as to claim 4, (fig. 2); as to claims 5 and 11, (22); as to claim 17, (figs. 2 and 3); as to claim 18, (20 is located within a lumen which does not have a reference numeral, see figs. 2 and 3); as to claim 19, (fig. 1); as to claim 20, (24); as to claims 22 and 23, (fig. 2); as to claims 24 and 25, (14a represents anti-tear device); as to claim 26, (col. 3); as to claim 27, figs. 1-3 and col. 4).

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Ebling et al in view of Osborne et al.

Ebling discloses the apparatus substantially as claimed except for wherein at least a portion of the anchoring member is substantially radiopaque. It would have been an obvious matter of design choice to make the anchoring member radiopaque, since such a modification would have involved a mere change in material. A change in material is generally recognized as being within the level of ordinary skill in the art. Furthermore, Osborne clearly discloses radiopaque bands (22 and 24). Therefore, it would have been obvious to one of ordinary skill in

Art Unit: 3763

the art at the time the invention was made to specifically modify the anchoring material of Ebling with the material of Osborne's radiopaque bands to insure proper positioning of the catheter, since Ebling teaches that his anchor (24) may be formed of any electrically conductive material.

*Conclusion*

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Kevin C. Sirmons whose telephone number is (703) 306-5410. The examiner can normally be reached on Monday - Thursday from 6:30 am to 4:00 pm. The examiner can also be reached on alternate Fridays.
